EDUCATION

- **MEDICAPS UNIVERSITY** INDORE(M.P), India
Bachelor of Technology - Information Technology: CGPA: 8.86 2021 - 2025
- **St Paul's Convent Sr. Sec. School** UJJAIN(M.P), India
PCM-12th Standard(CBSE) PERCENTAGE: 92.4 March 2019 - March 2021
- **St Paul's Convent Sr. Sec. School** UJJAIN(M.P), India
10th Standard(CBSE) PERCENTAGE: 87.8 March 2018 - March 2019

SKILLS

- **Coding Languages:** Java, C, SQL
- **Frameworks:** Spring Boot, Spring MVC, Hibernate, Spring Data JPA, REST API, Microservices
- **Web Technologies:** HTML, CSS (DHTML), XML, Cookies, Cache Management
- **Tools Platforms:** Android Studio, JIRA, VS Code, Spring Tool Suite 4
- **Cloud Platforms:** AWS, Oracle Cloud Infrastructure (OCI), Oracle Fusion Applications

INTERNSHIP

- **PwC Acceleration Centers**
CRR(Cyber Risk and Regulatory) Intern — ETS-ORACLE: February 2025 - Present
As the Enterprise Technology Solution intern I am Working on Oracle Fusion Cloud ERP to design and implement robust security frameworks, including role-based access control (RBAC), user provisioning, and segregation of duties (SoD) analysis. Secured key ERP modules like Finance, HCM, and SCM based on client-specific compliance needs. Also collaborated with the Functional team to align security configurations with business processes and functional requirements.

Tools and Technologies: Oracle Fusion Cloud ERP, Oracle Role Design Tools, Oracle Identity and Access Management (IAM), OTBI, SQL and Jira for Ticketing and workflow tracking.
- **MII Foundation**
SDE) Intern : July 2024 - August 2024
As a SDE intern I contributed to the design and development of a live Employee Recruitment Portal tailored for Medi-Caps University. Worked on building end-to-end recruitment workflows, including job posting, applicant tracking, and admin panel functionalities. Ensured a user-friendly interface and efficient backend integration to streamline the hiring process within the university.

Tools and Technologies: Spring Boot, Java, Spring MVC, Spring Data JPA, Spring tool suite 4, MySQL and GitHub

PROJECTS/EXPERIENCE

- **Employee Recruitment Portal Medicaps University (Spring Boot):** The Employment Recruitment is a live project developed for Medicaps University which aims to streamline and enhance the recruitment process for job seekers and employers. This live project involves the development of a comprehensive platform that facilitates job postings, application management, and candidate selection.

Tools and Technologies: Spring Boot, Java, Spring MVC, Spring Data JPA, Spring tool suite 4, MySQL and GitHub
- **Milling and Commodities (Android):** This is a Android based application. This application is a request-response site which picks-up the raw cereals and drops the milled cereals like flour . The Online Flour Service project aims to provide customers with a convenient platform to purchase flour and related commodities, books the slots for milling services, register complaints, check status updates, and provide feedback. The project leverages modern technology to streamline the process of purchasing flour and accessing milling services, catering to the needs of both individual consumers and businesses.

Tools and Technologies: Android Studio, Android SDK, XML Firebase and FireStore
- **Charity ON (Java):** Developed a web-based platform focused on aiding street beggars, handicapped children, and adults. Developed an integrated system that improved the fundraising process, resulting in a 25 donations and significant community outreach, helping over 200 families gain access to essential resources.

Tools and Technologies: Advance Java, JSP, Servlet, SQLyog database, HTML, DHTML
